

## Professional-Grade Abrasives

Originally introduced in 1958, Mill-Rose *Clean-Fit* Abrasive Product Line has expanded to become the most complete in the industry. Our abrasive cloths are bonded with a special Urea resin to resist moisture and give extra service under demanding conditions. In addition to seven types of abrasive cloths available in handy dispenser cartons and "Mini-Strips" in pocket size packs for small jobs, Mill-Rose also offers a complete line of abrasive nylon hand pads.

### **Silicon Carbide Open Nylon Mesh - 180 Grit (Yellow Box)**

New! Completely waterproof. Designed to reduce loading, this premium-grade open mesh is sharper and cuts faster, producing finer scratch patterns on surfaces. Use on ferrous and non-ferrous metals, ceramics, plastics, fiberglass, etc. Available in three roll lengths 1-1/2" wide: #70092 (5 yards); #70102 (10 yards); and #70113 (25 yards).

### **Aluminum Oxide Open Mesh - 180 Grit (Orange Box)**

Completely waterproof. Premium grade. Provides fast cutting action on copper, brass and other non-ferrous or plastic materials. Can be cleaned and reused by rinsing out with water. Available in three roll lengths 1-1/2" wide: #70090 (5 yards); #70100 (10 yards); and #70110 (25 yards).

### **"Wet One" Aluminum Oxide - 120 Grit (Blue Box)**

Premium-grade aluminum oxide is 100% waterproof. Ideal for tough deburring and cleaning of tubing, parts exposed to water. Delivers long-lasting performance under the most severe conditions. Available in four roll lengths 1-1/2" wide: #70161 (2 yards - carded); #70162 (5 yards); #70164 (10 yards); and #70166 (25 yards).

### **Red Stuff Aluminum Oxide - 120 Grit (Red Box)**

Our best quality *closed coat* abrasive cloth with a "J" weight cotton backing. It's water resistant and features a full aluminum-oxide coating for increased cutting power.

*The original copper tubing cleaner.* Available in three roll lengths 1-1/2" wide: #70045 (5 yards); #70050 (10 yards); and #70060 (25 yards).

### **Yellow Stuff Aluminum Oxide - 120 Grit (Yellow Box)**

Our best quality *open coat* abrasive cloth with a "J" weight cotton backing. It's water-resistant and resists loading while leaving a consistent surface for soldering operations. Widely used by the air conditioning/refrigeration trade. Available in three roll lengths 1-1/2" wide: #70068 (5 yards); #70070 (10 yards); and #70080 (25 yards).

### **Brown Stuff Aluminum Oxide -120 Grit (Brown Box)**

Good quality *closed coat* abrasive cloth with a "J" weight cotton backing. Water-resistant bonding and flexible backing provides a durable, efficient abrasive for long life. Economical alternative to the "Red Stuff". Available in four roll lengths 1-1/2" wide: #70125 (5 yards); #70130 (10 yards); #70140 (25 yards); and #70150 (50 yards).

### **Economy Aluminum Oxide - 120 Grit (White Box)**

Good, economy-grade *closed coat* abrasive cloth with "J" weight cotton backing. Water resistant. Available in three roll lengths 1-1/2" wide: #70175 (5 yards); #70170 (10 yards); and #70180 (25 yards).

**Clean Fit Abrasive Cloth Display/Shippers**

70085	Yellow - Open Coat	120 Aluminum Oxide
70065	Red - Closed Coat	120 Aluminum Oxide
70160	Brown - Closed Coat	120 Aluminum Oxide
70168	"Wet-One"	120 Aluminum Oxide
70120	Open Mesh - A/O	180 Aluminum Oxide
70119	Open Mesh - S/C	180 Silicone Carbide
*70000	Assortment	2 each of the above

## "Cloth Caddy" Sand Cloth Dispenser

Protects and stores sand cloth up to 1-1/2" wide by 10 yards.

Convenient dispenser protects sand cloth from being mangled and deformed. High-impact plastic dispenser is perfect for tool boxes, shop drawers, work benches or wherever sand cloth is stored. Lets you tear off the exact amount required.

Cat. #	Description
70950	Sand Cloth Dispenser - high impact plastic

## Nylon Abrasive Grit Hand Pads

Designed for a broad range of applications, from heavy-duty cleaning to finishing. These pads are very durable, can be used wet or dry, and will not rust. An excellent alternative to steel wool. Pads are 4" x 6"

### Maroon Commercial A.O. Hand Pad - Fine

Premium-quality hand pad for aggressive cleaning and deburring. Ideal for general cleaning and deburring where a fast initial cut is desired. Ideal for cleaning copper tubing and fitting prior to brazing. This pad is stronger, more resilient, resists tearing and snagging and is solvent-resistant. Catalog #70198, #70197, #70299.

### Maroon General-Purpose A.O. Pad - Very Fine

Provides aggressive cutting action and long life. Coated surface is an economical alternative to our fine-quality pad. Ideal for satin finishing, stainless steel finishes, scuffing surfaces prior to applying adhesives, and removing rust, corrosion and oxides. Catalog #70181, #70199.

### Black Silicone Carbide Hand Pad - Fine

Extremely resilient, conforms to irregular surfaces. Ideal for general purpose applications, including removing rust and oxidation from metals, blending around solder joints, cleaning molds and satin-finish aluminum. Catalog #70186, #70185.

### White Non-Abrasive Hand Pad

New! Designed for light cleaning and finishing without abrasive. Soft and flexible, yet very tough. Can be used on metal, wood, plastic, porcelain, vitreous china, acrylics or fiberglass with high luster finishes. Catalog #70325.

Most Aggressive		Least Aggressive
