New Water-Gate[®] Tool Lets You Repair Water Lines Without Draining!

Mentor, OH – Change out a valve, solder or glue fittings, make waterline repairs and test lines under pressure with the Water-Gate, a new water shut-off tool now available from Clean-Fit Products, a division of The Mill-Rose Company.

The Water-Gate tool inserts into copper, steel, PVC and CPVC pipe through valves, fittings and couplings to form a tight, leakproof seal. There is no need to shut off water to the rest of the building, drain lines, use bread clogs or freeze lines. The Water-Gate tool features a flexible seal that withstands temperatures from -20⁰F to 225⁰F and is pressure rated to 65 psi.

Ideal for refrigeration and boiler applications, the Water-Gate tool makes fast work when replacing valves, 90⁰ elbows and “Tees”, and fixing pinhole and midpipe leaks. The Water-Gate tool is individually packaged in standard sizes from 1/2” to 4”, and is also available in a convenient kit that contains a popular assortment of sizes, at leading supply houses.

Clean-Fit Products is a division of The Mill-Rose Company, leading manufacturer and distributor of brushes, abrasives, PTFE sealants and accessories used by professional contractors and do-it-yourselfers. For further information
