FOR IMMEDIATE RELEASE - November 19, 2013

New Blue Monster® Compression Seal Tape Stops Problem Leaks Without Turning Off Water Source

Mentor, OH – Contractors can fix problem leaks under pressure without turning off the water source with new [Blue Monster® compression seal tape](#) introduced by Clean-Fit Products, a division of The Mill-Rose Company. Developed for professional plumbing contractors, Blue Monster compression seal tape is equally effective for crisis and long-term applications.

Contractors can seal leaks up to 150 PSI on almost any material, from galvanized and cast iron to copper and all types of plastics and rubber. Blue Monster® compression seal tape features self-fusing layers that form a waterproof seal by compression without

the use of any adhesive. Pulling and wrapping the tape tightly around problem leaks creates a chemical reaction that fuses the layers of tape into a mass of silicone. Once fused, the silicon mass forms a heavy-duty bond on the leak or connection that serves as the emergency or long-term repair.

Blue Monster[®] compression seal tape is offered in 1" x 12-foot rolls packaged in a round, plastic case for convenient storage in toolboxes, drawers or storage cases. This tape is environmentally safe and non-toxic, safe for drinking water applications, and effectively seals up to 500°F / 260°C. Applications range from traditional plumbing to irrigation pipe repair.

Blue Monster[®] compression seal tape is available at leading plumbing wholesalers from Clean-Fit Products, a division of The Mill-Rose Company, the world's leading supplier of PTFE thread sealants and largest manufacturer of twisted-in-wire brushes in the U.S.A. For further information contact Clean-Fit Products, 7310 Corporate Blvd., Mentor, Ohio 44060. Telephone 1-800-321-3598, fax 1-440-255-1072, e-mail info@cleanfit.com or visit the company's web site at <http://www.cleanfit.com>.
