

Specially Formulated Copper-based Lubricant

BLUE MONSTER®

Copper Anti-Seize Lubricant

Copper-based Anti-Seize Lubricant Formulated for High-Temperature and High-Pressure Environments

Mill-Rose Blue Monster Copper Anti-Seize is a specially formulated copper-based thread lubricant for high temperature up to 1800°F (982°C) and high-pressure environments. Blue Monster Copper Anti-Seize contains special ingredients that produce a permanent leak-proof metallic seal under pressure, and prevents seizing, galling and corrosion under extreme conditions.

Recommended Uses

Mill-Rose Blue Monster Copper Anti-Seize can be used as a lubricant for bearings, drill collars, gear reducers, tool joints, rotary shoulder connections, screws, flange connections, couplings, seals, studs, bolts, plugs, pins, bushings, valve seats, valve stems, valve packing assemblies, valve gate assemblies, slides and key ways. It is excellent for use on high-pressure corrosive systems. **DO NOT USE** on stainless steel. Copper on stainless steel creates corrosion leading to damaged parts.

Blue Monster Copper Anti-Seize lubricant will not bleed, separate, or settle. Prevents pressure leakage and seizing resulting from high temperature, freezing, heavy loads, corrosion, and vibration. Contains no grit. Prevents rust and corrosion. Specially formulated for summer or winter use. Provides easy assembly and disassembly of bolts, plugs, studs, flanges, and fittings.

Cat #	Size	Case Pack	Weight
76024	Net Wt. 10 oz. (283 g.)	12/case	10 lbs. (4.54 kg)
76026	Net Wt. 16 oz. (454 g.)	12/case	19 lbs. (8.62kg)

For Material Safety Data Sheets, contact Mill-Rose or download directly from the Mill-Rose Clean-Fit website.

Color/Consistency

Copper color brushable paste of smooth, grit free consistency.
 NLGI Consistency: 2 Sulphur Typical: 0.5%
 Worked Penetration: 290-310 Shelf Life Indefinite
 Coefficient of Friction: 0.1

Temperature Range Use

Gases: -0°F (-17°C) to 1800°F (982°C) Brushable to: 10°F (-12°C)
 Liquids: -0°F (-17°C) to 1800°F (982°C) Pour Point: 32°F (0°C)

Corrosiveness

Mill-Rose Blue Monster Copper Anti-Seize is non-corrosive, and prevents the corrosion and seizing of threads.

For Use With:

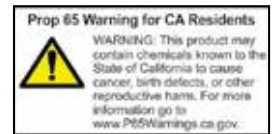

All types of metal including stainless steel, nickel, copper, cast iron, brass and titanium.

U.S. Federal Specifications

Mill-Rose Blue Monster Copper Anti-Seize meets and exceeds MIL-A-907D.

Environmental Statement

Mill-Rose Blue Monster Copper Anti-Seize is formulated with inorganic grease and is free from any lead containing ingredients.

Directions For Use

1. Remove all dust, grease, oil, and any foreign material from mating surfaces.
2. Apply Mill-Rose Blue Monster Copper Anti-Seize lubricant and thread sealant to mating surfaces and assemble.
3. Keep container closed at all times when not in use to avoid contamination.
4. Do not use on oxygen systems
5. Requires no thinners.
